### **Ocean Water Quality Monitoring Report**

VENTURA, California – Ocean water quality results from samples collected this week indicate that ocean water quality at the following Ventura County beach sampling locations failed to meet State standards for bacteria:

- Rincon Beach - South of Creek
- Surfer's Knoll Beach

Warning signs are currently posted and contact with ocean water should be avoided for a minimum of 50 yards on either side of each posted sign. Warning signs will remain posted until ocean water quality meets State standards. Any items that may have come in contact with ocean water should be avoided. If contact occurs, wash thoroughly with soap and water.

Any shellfish on or from Ventura County beaches may have also been exposed to this contamination and should not be eaten.

Ocean Water Quality Monitoring Program staff will continue with weekly bacteriological sampling of Ventura County beaches. Bacteriological sample results for specific beaches are also available on the Environmental Health Division hotline (recorded information) at (805) 662-6555, and by visiting the [Ocean Water Quality Monitoring Program](#) webpage.

You can also view any current beach advisories and learn about the State ocean water quality standards on the VC Safe Beaches app, available for Android and Apple devices.
