

## List of Qualified Restoration Plan Biological Consultants

---

County of Ventura • Resources Management Agency • Planning Division  
800 S. Victoria Ave., Ventura, CA 93009 • 805/654-2465 • [www.vcrma.org/planning](http://www.vcrma.org/planning)

### List of Planning Division Approved Biological Consultants who are Qualified to Work on Restoration Plans

*Only the biologists listed below are qualified to work on restoration projects in the unincorporated County of Ventura. Biologists that complete restoration work and are not included on this qualified list will have the work product rejected by the Planning Division. To successfully restore a specific habitat type requires significant experience and training. To ensure that applicants do not spend more money than necessary for work that is unsuccessful, the County requires that restoration specialists have proven experience in the different phases of restoration work and with the habitat types (wetland versus coastal chaparral) or rare plant they are being paid to restore by the applicant.*

*Please note the list below includes a column labeled “Primary or Support Restoration Specialist”. This means the following:*

- **Primary Restoration Specialist** has the authority to **develop, revise, and implement all habitat or species restoration plans or other prescribed habitat compensatory mitigation requirements for the County.**
- **Supporting Restoration Specialist** may implement the activities of the adopted restoration plan or other prescribed habitat compensatory mitigation requirements as described within the plan. This includes **preparing and submitting all monitoring and final reports, conducting all required restoration activities (plantings, irrigations, monitoring, invasive species removal, etc.).**

*For example, if your project requires a full restoration plan, please select a primary restoration specialist with experience restoring the habitat type you must restore. If you only require the submission of monitoring reports and you have a plan previously developed, you may select a supporting restoration specialist to finish implementing the existing restoration plan in place. For additional questions about the Planning Division’s Qualified Biologist Program, please visit, [vcrma.org/en/biological-report-procedures](http://vcrma.org/en/biological-report-procedures).*

## Primary Restoration Specialists

Contact for the development, revision and implementation of restoration plans or other prescribed habitat compensatory mitigation requirements for the County.

Company	First Name	Last Name	Biologist Phone Number	Biologist Email	Primary or Support Restoration Specialist	Restoration Type
